

Secure Web Accelerator

Cloudflare is a market leader in web infrastructure services and provides undeniably fast, reliable, and secure DNS for over 26 million Internet properties worldwide.

What is Secure Web Accelerator?

Secure Web Accelerator (SWA) is our family of web infrastructure and website security solutions powered by Cloudflare's global content delivery network (CDN). Cloudflare's massive network secures your valuable digital assets from vulnerabilities and attacks, with industry-leading technologies, custom insights, and a blazing fast network.

99% of the world's population is close to a Cloudflare data center which means your website is served to visitors faster than ever at a truly global scale.

Why Secure Web Accelerator?

- 1,000+ employees
- 165 data centers
- 10M+ customers
- In 95 countries around the world

Updating and deploying new technology and algorithms to combat sophisticated attacks is a full-time job that requires the expertise of seasoned professionals. Web application firewalls (WAF) with built-in Cloudflare rule sets improves your website security, speed, and reliability and provides an elevated user experience.

SWA solves the challenges of the Internet.

PERFORMANCE

Cloudflare's global content delivery network (CDN) sends your traffic to the closest server so your customers can enjoy a better and faster experience.

SECURITY

Security engineers at Cloudflare are constantly creating custom rules to protect your website against a variety of cyber attacks.

RELIABILITY

Cloudflare provides 99.99% SLA and uptime guarantee. If one server is unavailable, Cloudflare will route your traffic to another server so you never have to experience downtime again.

INSIGHTS

Set up alerts and notifications surrounding your DNS record settings, so you always know how your website is reporting.

EASY SETUP

We'll take care of everything for you!

HOW TO CHOOSE THE RIGHT SWA PLAN FOR YOU?

Secure Web Accelerator

In an Internet filled with threats, every website could use a performance and security boost.

Our intro Secure Web Accelerator plan gives you access to:

- Cloudflare's global content delivery network (CDN)
- Purge Cache
- Developer Mode
- Unmetered DDoS Mitigation
- DNSSEC
- Global Anycast DNS

Secure Web Accelerator Plus

In addition to enhanced security features and accelerated site speed with image optimization, the main benefit of Secure Web Accelerator Plus is gaining access to the Cloudflare control panel. Additional features of this plan include:

- All of the features of the Secure Web Accelerator plan
- The Cloudflare control panel
- Web Application Firewall (WAF)
- Image Optimization
- 20 Page Rules
- 20 Firewall Rules
- 10 Rate Limiting Rules
- Minimize Time to Live (TTL) Configurations
- Image Optimization with Polish, Mirage, Brotli
- Cloudflare Dashboard with Custom Insights

Secure Web Accelerator Professional

Secure Web Accelerator Pro provides enterprise-level CDN, DNS, DDoS protection and security with maximum customization.

Incentives for upgrading to our most professional plan:

- All of the features of the Secure Web Accelerator Plus plan
- Railgun™
- Image Resizing
- Custom SSL
- Up to 25 Custom WAF Rules
- 50 Page Rules
- 100 Firewall Rules
- 15 Rate Limiting Rules
- PCI DSS 3.2 Compliance

Top 3 reasons you need Secure Web Accelerator powered by CLOUDFLARE™

1

Speed up your website

Cloudflare's global network offers fast, reliable content delivery to optimize engagement, increase conversions, and reduce costs.

2

Enhance your security

Cloudflare security solutions protect and secure websites and infrastructures against denial-of-service (DDoS) attacks, customer data breaches, abusive bots, and other malicious cyber attacks.

3

Stay up all the time

More than 20 million internet properties, including major e-commerce sites, government agencies, and enterprises use Cloudflare DNS to make sure their website is online and always available to anyone in the world.
